

Do you want to build robots?

The Vex Robotics Competition (VRC) teams build robots from metal parts, write the computer code to program them, and then compete against other schools in action-packed challenges.

Vex JV is the first step to joining this exciting team. JV students scout other teams at VRC events, help at home competitions, and learn strategies for competition success. Starting on 9/25/18, JV meets weekly on Tuesdays to build and program their own Vex robots in a fun, non-competitive environment.

Complete the JV program, and you can join the VRC team and compete with your own robot!

Benefits of Vex Robotics

- Extremely desirable resume-builder for college applications
- Real-world application of the skills you learn in your PLTW classes
- Expands your written and oral communication skills
- Fun, supportive teammates often become lifelong friends

Complete and return this form with one time registration fee of \$40 to the Mr. Persons by Tuesday September 25th, 2018
